

MUHANNAD YAZBAK

Full-Stack Developer & QA Automation Engineer
+972548034062 | yazbakm@gmail.com | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Detail-oriented **QA Engineer** holding dual [B.Sc.](#) degrees (including Information Systems from Haifa University) with a strong technical background in manual testing methodologies, API verification, SQL database testing, and test documentation (STP, STD, STR). Skilled in analyzing complex web applications, verifying REST API responses, inspecting relational databases, and identifying edge cases in dynamic CRM/ERP environments. Experienced in manual defect tracking, boundary testing, and ensuring strict compliance with system requirements. Native/fluent communicator seeking to join Grow Payments in Petah Tikva.

CORE QA COMPETENCIES & TECHNICAL SKILLS

- **QA Methodologies & Testing:** Manual Testing, Functional & Regression Testing, STP / STD / STR Documentation, Test Case Design, Edge-Case & Boundary Analysis, Bug Tracking (Jira).
- **API & Web Testing:** REST API Validation (HTTP status codes, payload verification, error handling), Browser DevTools Network Inspection, End-to-End Workflow Verification.
- **Databases & Querying:** SQL (PostgreSQL, MySQL, SQLite), Data Verification, Schema Validation, Joint Queries, Data Integrity Auditing.
- **Technical Knowledge:** JavaScript, TypeScript, Python, Next.js, FastAPI, Docker, Git/GitHub, Appium, Mockoon.

QA & SYSTEM TESTING PROJECTS

Multi-Tenant SaaS CRM Platform | *Functional, Database & API QA*

- **API & System Validation:** Executed functional, boundary, and regression test suites against RESTful APIs built on FastAPI and PostgreSQL.
- **Database State Verification:** Wrote and executed targeted SQL queries to inspect schema isolation, dynamic JSONB fields, and soft-delete state changes (*active* to *inactive*).
- **Test Scenario Coverage:** Designed test procedures validating multi-tenant login flows, request headers (*X-Tenant*), CORS validation, and backend exception/422 error handling.

Localized Insurance Agency ERP/CRM Application | *Desktop & Functional Testing*

- **Test Plan & Execution (STP/STD):** Authored test design cases verifying client record creation, insurance policy linking, and offline desktop state consistency.
- **Data Ingestion Verification:** Tested secure drag-and-drop file archiving workflows, verifying file path mappings in SQLite and local file system structures.

Appleseeds QA Engineering Program | *E2E Test Suite for Rami-Levy*

- **Test Suite Design:** Developed end-to-end functional testing suites for a high-volume e-commerce platform covering product selection, user authorization, and checkout funnels.
- **Defect Lifecycle:** Documented detailed bug reports, steps to reproduce, and expected vs. actual outcomes.

EDUCATION & TRAINING

- **B.Sc. in Information Systems** (BI Specialization) – *University of Haifa* (2019–2023)
- **B.Sc. in Medical Laboratory Sciences** – *Ben-Gurion University of the Negev* (2010–2013)
- **QA Automation Engineering Program** – *Appleseeds (Elevation)* (2023)
- **Software Development Training** – *Tsofen (Java/Spring) & WebAhead (React/JS)* (2021–2022)
